All data refer to the European base model with standard equipment. Fuel consumption data and CO₂ emissions data are determined according to regulation 2007/715/EC, taking into consideration the vehicle curb weight, as stipulated by the regulation. Additional equipment can lead to slightly higher fuel consumption and therefore CO₂ exhaust emissions than the declared values. In addition, they can raise the vehicle's curb weight and in some cases also increase the gross vehicle weight, the maximum allowable axle loads and respectively reduce the permitted trailer load. Therefore the maximum speed may be decreased while acceleration time can be increased. The published performance figures are possible with the vehicle's curb weight excluding driver plus a 200 kilogram load allowance.
